Foot & Body Wash

FungaSoap® is a gentle, yet effective cleansing wash that helps remove fungus and bacteria from skin surfaces. It is easy to use in the shower or bath, added to a foot soak, or applied with a washcloth. It helps relieve the discomfort of itching and dryness associated with Athlete's Foot, skin irritation and rashes, fungal nails, prosthetic & brace use, residual limb cleaning and more.

FungaSoap® Cleansing Wash — Enriched with Tea Tree Oil

Win the Fungus Battle!

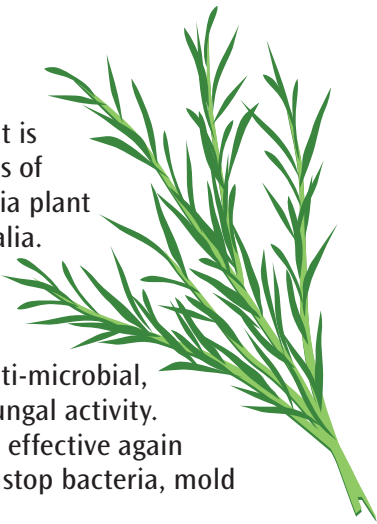

This patented soap features Tea Tree Oil — used for thousands of years as a disinfectant to fight germs, and as an antiseptic to help prevent infection. Applied alone, or as a complement to antifungal and topical medications, to help ease the symptoms of foot and body fungus problems.

Doctor Recommended!

FungaSoap® was formulated by a doctor and dermatology experts, and is now used and recommended by thousands of healthcare professionals who've seen it work. It gently cleans and moisturizes to keep skin healthy, with an exclusive combination of all-natural ingredients that are thought to work better together, than individually:

Tea Tree Oil

Is an essential oil with a fresh, stringent odor. It is removed from the leaves of the Melaleuca Alternifolia plant which is native to Australia. When applied topically, it has a history of beneficial properties including anti-septic, anti-microbial, anti-bacterial and ant-fungal activity. In studies, it has proven effective against dermatophytes, shown to stop bacteria, mold and fungal growth.

Potassium Coconut Oil Soap

(Potassium Cocoate) is the potassium salt of coconut fatty acid derived from whole coconut oil. It contains natural glycerin, which serves as a moisturizer.

Olive Oil Potassium Soap

(Potassium Oliviate) is a natural, deep penetrating moisturizer, believed to regenerate and soften skin cells and tissue.

Glycerin is a clear, thick liquid that helps moisturize skin. It is one of many substances that help maintain the outer skin barrier and prevent dryness and scaling.

Peppermint Oil (Menth Piperita Oil) has a fresh, strong menthol smell and the capacity to relieve skin irritation and itchiness. Its cooling action helps reduce skin inflammation and tenderness. It is thought to activate cold-sensitive receptors in skin tissues, causing the cooling sensation that follows its application.

Rosemary Oils (Rosmarinus Officinalis Oil) offer the medicinal benefits of rosemary oil – though for centuries to act as a powerful antioxidant and preservative that helps fight skin infections.

Jojoba Oil (Potassium Jojobate) is derived from the liquid sap of the Jojoba plant, native to the American southwest and Mexico. It is very similar to the sebum oil produced naturally by human glands, and is a known natural fungicide and emulsifier.

Aloe Vera (Aloe Barbadensis Leaf) is well known for its skin rejuvenating, healing, soothing and moisturizing properties.

3 Convenient Sizes

“My podiatrist recommended this soap for my feet. I use it every time I shower. I have kept the Athlete’s Foot at bay”

“If you have fungal issues on your body, this will really help clear them. I apply it before getting my skin wet and then wash off 5 minutes later. You can see it has even helped with back and body acne. I will be buying more bottles”
